PUBLIC SALE

We were impressed by the STAKD public sale execution. They sold out in less than 60 seconds without issues and fairly. This is why we chose them as our partners. Our public sale will be executed by using their platform. First 10 minutes of the public sale will only be available for people holding more than 500 STAKD or providing liquidity with that amount. After the first 10 minutes pass, everyone will be able to participate.
